

# Craft Stick Star

Using the photos to the left as a guide, glue 5 craft sticks together to make a star. Let the glue dry a bit, then write the name of someone who is a star in your life on one of the sticks. Next, decorate your star with whatever you have in your craft supplies—buttons, sequins, jewels, beans, pom poms, etc. Hang your star where you will remember to thank God for this person each day!

# 3D Paper Stars

## Easy Decorations

Red Ted Art

These stars require some patience and practice, but once you get the hang of it, you will enjoy it and find it is easy to make several for all of the people who are stars in your life!

Here are the print instructions, followed by photos of each step. For more guidance, go to

<https://www.redtedart.com/3d-paper-star-kirigami/>

- 1) Fold your paper in half (see image two).
- 2) Fold up the bottom corner. Fold down.
- 3) Fold down the top corner and then open it up again.

This will give you a CROSS shape on the right hand side of your paper.

Your paper should open up at the top and have the fold at the bottom.

- 5) Now take the bottom LEFT CORNER and bring it over right to the middle of the cross.  
Note: you are NOT lining up the edge of the paper with the cross.

- 6) Now lift the flap and fold over. This time, you are lining up the sheets of paper as per the image on the top right.

- 7) Take the right bottom corner and bring it across. Again lining up the edges.

- 8) Flip your paper over.

- 9) Fold the right over onto the left.

- 10) Now you are ready to cut – cut along the line the scissors make in the picture on the right.

Open your star up and make the creases all go in the right direction! You are done!

**Remember: it is VERY important that you get that “final cut” right.. this is where most people go wrong and end up with a pentagon!**
